

HIVEGUARD™

HiveGuard™ is a proprietary blend of paraffin wax and microcrystalline wax designed exclusively for beekeepers to enhance hive and woodenware protection. HiveGuard's unique formula is **FDA-COMPLIANT for use with direct and indirect food contact**, and provides the following benefits:

- Optimal wax formulation
 - superior preservation & disease prevention
 - maximum penetration/impregnation
 - maintains flexibility to prevent cracking
 - excellent adhesion
 - highly cost effective
 - up to 25 years durability

Used successfully by beekeepers all across North America, HiveGuard™ replaces “unfriendly” chemicals such as rosin, copper complexes, volatile solvents and paints to provide a food safe long term cost effective solution.

Better for your bees. Better for the environment. Better for your business.
